

2010 Integral Safety Assessment Survey Thank you!

Richmond Refinery

On September third, the ISA survey window closed at the Richmond Refinery. This year, 954 surveys were completed (599 online surveys, and 355 paper surveys). That's about 300 more surveys than we received in 2008.

Thank you for your participation and time! Your survey will be used to create group results that collectively form a "picture" of our current safety culture. The current group results will also be compared to our 2008 results, and finally, the IIFLT will plan our Incident and Injury Free activities based on the information.

JMJ Associates is assembling the results for the IIF leadership team. The refinery will receive the information as a component of our 4Q proactive event.

IIF Leadership Team
